- Secured 25+ leading founders, professors, and influencers heading some of the most innovative startups in fintech worldwide
- Led a team of 6 club members; generated in-depth debrief reports to plan episode discussions

UNIVERSITY PROJECTS

AIRBNB MACHINE LEARNING PREDICTION CASE

Dec 2024

- Led a team to first place, developing a predictive model that was 11% more accurate than the class average
- Developed predictive model to predict future bookings, using a database with 1,300,000+ observations
- Optimized random forest model by tuning hyperparameters to minimize root mean square error (RMSE)
- Applied feature engineering and data preprocessing to enhance model accuracy and reduce overfitting/underfitting
- Visualized trends and model performance, providing actionable insights into booking behavior

KB HOME FINANCIAL PLANNING & ANALYSIS CASE

Apr 2024

- Analyzed static, flexible, and sales-volume budget variances to identify key drivers of financial performance
- Built regression models to forecast unit sales, revenue, costs, and SG&A using historical and market data
- Developed an FY2024 budgeted income statement using forecasted operating and financial results
- Evaluated divisional performance using ROI and residual income to recommend improved performance measures
